

SPEND MEND

SpendMend Pharmacy Procurement Software

A Critical Function In Pharmacy

When buying vital drugs to maintain patient care and successful operations across hospitals, clinics and other healthcare facilities, pharmacy buyers must scroll through long convoluted lists of NDCs attempting to select the right one for their organization. The process is cumbersome, inexact and leads to elevated costs, missed discounts, inefficient operations, compromised patient care and more.

To solve these problems, SpendMend Pharmacy offers Trulla - the healthcare industry's only software solution to simplify and secure a process that enables buyers to select the right NDC every time, while saving FTE hours and greatly reducing costs in the process.

Trulla is a cloud-based application – built by pharmacists and technicians – that enables health systems to manage their pharmacy ordering for all locations in one system. The multi-tenant portal allows all buyers to easily drive compliance to contracts and preferred NDCs and suppliers across all pharmacy spend, including 340B eligible purchases.

Features of Pharmacy Procurement Software

Single-System Ordering

Auto-route orders to the correct supplier and NDC from a single cart

Pricing Updates

Receive daily pricing from many vendors, including wholesalers

Shortage Tracking

Track and manage medication shortages impacting your system over time

340B Integration

Integrate with split-billing software to ensure 340B compliance

System-Wide Inventory

Integrate inventory devices for system-wide, facility specific monitoring

Medication Transfers

Set up internal suppliers to provide medications across your locations

Responsive Design

Manage purchasing process from your desktop, tablet, and/or phone

Consolidated Service Center (CSC)

Facilitate ordering to and from a CSC throughout a health system

Cloud-Based Portal

Access the system in a secure, multi-tenant, online portal from anywhere

Benefits of Pharmacy Procurement Software

Formulary Compliance

Ensure buyers purchase the right drug and package/NDC from the right source

340B Compliance

Ensure compliance to the 340B program as you move medications across facilities

Optimized Inventory

Optimize inventory levels, manage shortages, and reduce expired medications

Simplified Access

Access entire health system with every pharmacy delivery location in one place

User Management

Assign and manage role and permissions for each individual and/or user types

Supplier Compliance

Drive purchase compliance with your approved suppliers only

NDC Compliance

Drive compliance exclusively with your contracted and preferred NDCs

Order Assurance

Ensure order routing to internal location, supplier, wholesaler, manufacturer

Cloud-Based Portal

Maximize economies of scale for your consolidated services center

Maximize Your Pharmacy Cost Savings

There are many reasons to consider pharmacy procurement software and cost savings is a big one. Most of our clients save between 4-6% of their annual pharmacy spend. Whether it's NDC standardization, price variance monitoring, packaging, compounding, low unit-of-measure distribution, or strategic buys; we can help you find and capture your cost savings opportunities.

Momentum With Clients

\$5.5B Not-For-Profit Health System In Southeastern U.S.

- Went live with Trulla's Analytics in March 2022
