Getting Started

To begin the project, we work with you to pull your initial data set. We then provide an in-depth assessment of your environment and tailor our services to your specific needs with a combination of compliance and optimization solutions.

Our team is comprised of former pharmacy leaders who understand the heavy workload of your department. With this in mind, all our work is performed with the goal of limiting the time required from you and your staff.

Pricing for our compliance services is based on the complexity and size of your facility. Pricing for our Optimization services is contingency based so your hospital/clinic will never be invoiced until you actually realize the savings from our solution.

SpendMend Mission

At SpendMend, we strive to help hospitals and clinics improve patient care through the delivery of innovative cost savings solutions, insightful transaction analysis, and improved visibility across business relationships.
